**What Browser Should I Use With Online Banking?**  
**Where Can I Update My Browser for Online Banking?**

Palmyra State Bank (PSB) requires that you use Internet Explorer 5.0 or greater with 128-bit Encryption or Netscape Communicator with 128-bit Encryption or higher versions.

If you do not have one of these versions, you should update your browser to work with PSB Online Banking. It is also important to keep your browser up to date to stay protected from the newest security threats on the Internet as well as utilize the latest and greatest technology.

You can update your Internet Explorer Browser at: <http://www.microsoft.com/windows/ie/default.msp>

You can update your Netscape Browser at: <http://channels.netscape.com/ns/browsers/default.jsp>

PSB does not endorse either of these browsers nor is PSB partnered with Netscape or Microsoft. Netscape Communicator is a product of Netscape Communications Corporation. Internet Explorer is a product of the Microsoft Corporation. Both products are available free of charge via the Internet at the above addresses. Should you be unable to download either of the products, PSB will be happy to provide you with a CD having both software programs on for you to choose which you prefer.

You should review the following system requirements to be sure your computer is capable of such programs:

Internet Explorer

- Windows 98, 98SE, ME, XP, NT 4.0SP6a, 2000
- 32MB RAM
- 15.0MB Hard Drive Space
- Pentium Processor or better

Netscape Communicator

- Windows 98, 98SE, ME, XP, NT 4.0, 2000
- 64MB RAM
- 50MB Hard Drive Space
- Pentium Processor or better

For best results and the best display of your account information, you should have your screen resolution set to 800x600 or greater.
